

FBE SERIES

ELECTRIC BASEBOARD HEATERS

- DUAL WATTAGE OPERATION ON 15002 MODEL
- PILOT INDICATOR LIGHT
- BUILT-IN CARRYING HANDLES
- HIGH TEMPERATURE SHUT-OFF

Don't waste energy and heat rooms you aren't using. Maintain individual room control with portable electric convector heat and get heat only in the places you want.

- Distinctive designed with high-impact Lexan end panels with built-in handles. Low profile design enhances the unique appearance and adds to the unit's overall stability.
- Built-in thermostat lets you regulate the amount of heat desired.
- Wattage indicator light — when the switch is in left position, the unit is operating at 1000 watts. When the switch is pointed right, it's operating at 1500 watts.

Heater is 7¹/₂"H x 5¹/₂"D

VALUE ADDED FEATURES

Wattage Indicator Light
FBE15002 Models Only

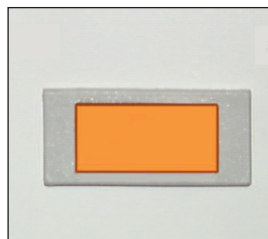

When the switch in the left position, the unit is operating at 1000 watts. When the switch is in the right position, it's operating at 1500 watts.

Thermostat

Two-Pole thermostat allows you to regulate the amount of heat desired.

Pilot Light

When unit is energized pilot light will illuminate.

Carrying Handles

Carrying handles are built-in to the end panels without detracting from the contemporary look of the heater. Lets you easily carry your heater from room-to-room
